: EL Mahalla

EDUCATION

Faculty of Computer Science, Tanta University

GPA: 3.0 (Very Good)

SUMMARAY

MERN Stack Developer with one year of experience in Node.js and two years in React. As a junior Frontend Developer with a solid foundation in computer science, I possess a strong understanding of algorithms and data structures, enhancing my problem-solving capabilities. Well-versed in various programming languages and fundamental programming concepts, I am actively involved in creating and improving the client-side of websites using React.

WORK EXPERINCE

Camp Coding — *Frontend Developer (Internship)*

 March 2024 – May 2024

Contributed to the development of an online courses platform. Gained hands-on experience in building responsive UIs using React. Improved performance and usability through front-end optimization. Collaborated effectively in a team environment using Git.

Qardy — *Full-Stack Developer*

 June 2025 – Present

Currently working on enhancing and maintaining a fintech platform. Responsible for developing robust backend services using Node.js and Express, and creating dynamic, responsive front-end components with React. Working in a collaborative Agile environment.

PROJECTS

Online-Courses: **GitHub:** [Link](#) | **Demo:** [Link](#) online courses platform similar to Udemy. The platform allows managers and admins to add courses and quizzes after subscribing to a monthly plan, while students can browse and purchase courses. Each user has a personal account, enabling them to follow other users and stay updated on newly released courses.

E-commerce: **GitHub:** [Link](#) | **Demo:** [Link](#)

e-commerce platform built using **React**, designed to facilitate the buying and selling of **laptops and phones**. The platform ensures a **responsive, efficient, and user-friendly experience**, providing smooth navigation, optimized performance, and seamless transactions for both buyers and sellers.

Honey Movies: **GitHub:** [Link](#) | **Demo:** [Link](#)

Developed a movie discovery app using Next.js, Axios, Prisma, and TMBDB API. Key features include server-side Rendering, Dynamic routing, user authentication, API integration for movie/TV show data, and a responsive, multilingual interface.

Online-Courses-(Api): GitHub: [Link](#)

online courses platform similar to Udemy, using **MongoDB, Node.js, and Express**. The API provides a complete backend solution, including **authentication, course management, Quiz management, user interactions, and payment handling**.

GYM-(Api): GitHub: [Link](#)

Gym Management System - Attendance & Subscription Management

This project is a **comprehensive gym management system** built using **Node.js** with **Sequelize** as an ORM for database management. The system is designed to streamline daily operations within a gym by providing a set of features to manage members, staff, trainers, and workout classes efficiently.

ArabDev(Graduation-project): GitHub: [Link](#) | Demo: [Link](#)

ArabDev is a professional networking platform tailored for developers and students, similar to LinkedIn but with a tech-focused twist. It offers key features like posting content (posts), following other developers, personalized profiles, roadmaps for learning, podcasts, coding challenges (assessments), and sections for input/output-based discussions. The platform aims to foster a supportive Arabic-speaking developer community, enabling users to connect, share knowledge, and grow together.

SKILLS

HTML | CSS | JavaScript | Bootstrap | Sass | Tailwind CSS | Typescript | Jest | ReactJS | Redux & Redux Toolkit | Nextjs | NodeJS | express&Nestjs

- **Version Control:** Git & GitHub
- **Programming Concepts:** Data Structures, OOP, Algorithms
- **Database:** SQL-> MSQL, NOSQL->MongoDB
